

Current State Analysis

Existing Application Landscape

The organization currently operates multiple systems including:

- Legacy CRM
- Portfolio Management System
- Excel-based reporting
- Advisor management tool

Current Process Flow

Client data is manually extracted from multiple systems and consolidated using Excel before generating portfolio reports.

Pain Points

- Duplicate client records
- Inconsistent portfolio balances
- Missing KYC records
- Delayed transaction reconciliation
- Manual reporting effort

Data Quality Challenges

- Invalid PAN numbers
- Incorrect date formats
- Missing email IDs
- Duplicate advisor mapping

Risk Assessment

Failure to address data quality issues before migration may lead to inaccurate client portfolios and regulatory issues.
