

Data Cleansing Report

Objective

Improve data quality before migration into the target platform.

Cleansing Activities

- Duplicate removal
- Invalid email correction
- Standardization of names and addresses
- Correction of invalid date formats

Exception Handling

Records with missing mandatory fields are routed to exception handling queues for manual review.

Data Standardization

Date formats standardized to YYYY-MM-DD.

Client names converted to uppercase.

Address abbreviations standardized.

Outcome

Improved overall data quality and reduced reconciliation issues during migration.
