

Data Mapping Document

Purpose

The purpose of this document is to define the mapping between source system fields and target system fields.

Sample Mapping

Source Table: CLIENT_MASTER

Source Field: CLIENT_NAME

Target Table: CUSTOMER

Target Field: FULL_NAME

Transformation: Convert to uppercase

Transformation Rules

- Remove special characters
- Standardize date format to YYYY-MM-DD
- Validate mandatory fields
- Apply currency conversion rules

Business Rules

- PAN number must be unique
- Advisor ID should exist in advisor master
- Portfolio balance cannot be negative

Validation Rules

All mandatory fields must pass validation before loading into target platform.
