

Data Profiling Report

Profiling Objective

Analyze the quality, completeness, and consistency of source data before migration.

Profiling Activities

- Duplicate analysis
- Null value analysis
- Data pattern analysis
- Data distribution analysis

Sample SQL Queries

```
SELECT COUNT(*) FROM CLIENT_MASTER WHERE PAN IS NULL;
```

```
SELECT CLIENT_ID, COUNT(*) FROM CLIENT_MASTER GROUP BY CLIENT_ID HAVING COUNT(*) > 1;
```

Findings

- 8% records missing PAN details
- 5% duplicate client records
- 12% invalid email formats

Recommendations

Data cleansing activities must be completed before ETL development.
